CRAFT MEISTER OXYGEN

PRODUCTS IN ACTION!

CRAFT MEISTER OXYGEN BREWERY WASH

Anytime a customer takes the time to send us feedback on our products is great but we especially love when they send pictures or video of our products in action.

Check out the photos and note sent to us by Patrick Sunberg. Patrick is a homebrewer who was testing a sample of our Craft Meister Oxygen on his carboy.

"I just ran a trial on a krausen-crusted carboy of mine. I used hot tap water and 0.5 oz of Craft Meister Oxygen Wash per gallon. The first picture is right before filling, second is 1 hour later, and the third is 3 hours after filling.

"It dissolved twice as fast and cleaned just as well or better than my previous cleaner using ordinary hot tap water and definitely did a good job of tearing away the organic matter at this concentration."

Patrick Sunberg, Baxter, Minnesota
